

# Multi-User DVD-ROMs

## Publish our Video Training on your Intranet for Multi-User Viewing

Multi-User DVD-ROMs are designed to be accessed by a predefined number of concurrent users, on a company Intranet or local area network. The DVD-ROMs contain identical content to that of our single user CD-ROMs. They contain movies, exercise documents, and an HTML directory to those files. This program is ideal for any institution that wants to host our movie content on an Intranet or within their local network. The license agreement restricts the number of concurrent users who can view the content simultaneously.

Some key benefits of this program include:

1. The ability to install our content on your Intranet or local area network.
2. Contains exercise files.
3. Relies on internal networking speeds, instead of external Internet bandwidth.

Available titles:

Currently, all of our titles are available as Multi-User DVD-ROMs.

Pricing:

The following pricing applies per training title, per single server installation, and for a one-year period:

Up to 25 Users	\$500
26- 50 Users	\$1,000
51 - 75 Users	\$1,400
76 - 100 Users	\$1,800

For purchasing accounts of more than 100 users, please contact us for a quote.
